

#### FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. Such modifications could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement.

To maintain compliance with FCC's RF exposure guidelines, the distance must be at least 20 cm between the radiator and your body, and fully supported by the operating and installation configurations of the transmitter and its antenna(s).

## 【Tips and Warnings】

In order to emphasize the important information of the user manual, special attention should be paid when seeing the label , which indicates some important warnings and reminders.

## 【Important Tips】

Please read all instructions before installation, it is recommended that the machine be installed by a car audio professional.

 This machine is suitable for vehicle 12V power supply system (grounding wire is required), please do not install this machine in 24V vehicle, otherwise it will damage the machine.

 Do not repair the power fuse without professional guidance. Improper use of the fuse can cause damage to the machine or cause a fire.

 To avoid violating traffic rules, drivers cannot watch videos while driving and operating machines to avoid unnecessary accidents.

 For the sake of safety and to ensure the normal use of the product, please invite professionals to install, disassemble or repair the machine to avoid machine damage and accidents.

 Please avoid placing this product in a humid environment and water to avoid fire due to electric shock or other unnecessary damage.

**Note:** To prevent burning out the machine, please do not energize until you have connected the power cord correctly!

## 【Test】

A quick simple test before the installation is to confirm that the device is working normally and as expected. In case there is a wrong step in the subsequent installation, which causes it to fail to work. If you perform a successful test but the unit did not work after installing it please recheck the installation steps.

Test car stereo: ① The red and yellow wires of the car stereo combine together firstly and then connected to the positive pole of the 12V battery, ② The black wire is connected to the negative pole of the battery. ③ 2 seconds later, check the car stereo, if the screen is lighting up, it means the car stereo is proper functioning.

## 【Installation】

### 1 Screw fixed installation

### 2 Card position fixed installation

### 3 Special frame fixed installation

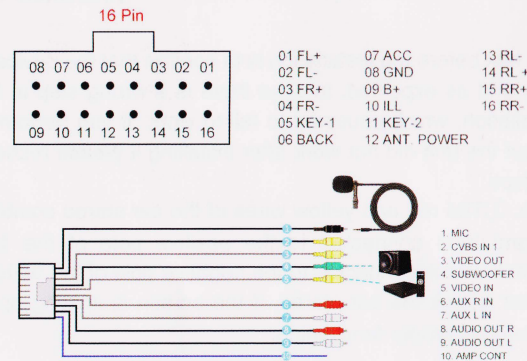

As shown in the figure above, there are three ways to install the machine, please choose one of them according to the actual situation. Of course, you can also re-install the new radio according to the installation method of the original car radio.

## 【Wiring】

(Note: The picture is for reference only, please refer to the actual product!)

### 1. Harness

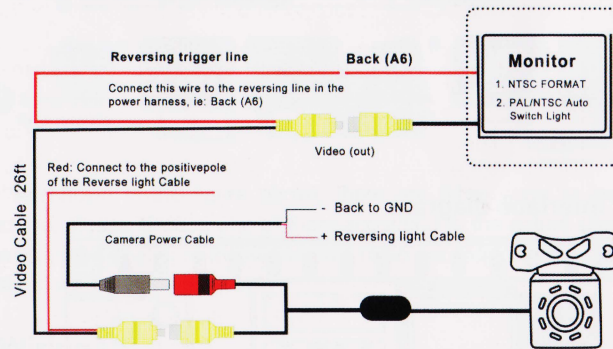

### 2. Back interface diagram

1. Power Cable
2. RCA Input/Output
3. Reversing camera input
4. Canbus interface
5. USB cable(4PIN)
6. USB cable(6PIN)
7. Reversing camera input
8. Radio Antenna
9. GPS Antenna

### 3. Rear view camera wiring (Optional)

1. Monitor (Not Included in the Package)
2. Camera Power Source
3. Camera (Optional)

**NOTE: Whether you are using a rear view camera or not, please connect the rear view wire. Otherwise, your WiFi and Bluetooth signals will suffer!**

## 【Icon Introduction】

### 1. Machine-Host

Symbol	Operations & Controls
MIC	Built-in microphone hole
RST	Reset (press with a sharp object)
Power	Power on the device Press and hold for 3 seconds to power off the device Short press repeatedly to mute or resume
Home	To main menu
Return	Return to the previous interface

⬆+	Press or hold repeatedly to increase volume
⬆-	Press or hold repeatedly to decrease volume

### 2. On Screen - Main Interface

(Note: The main interface is different for different products, please refer to the specific product)

Icon	Name	Operations
Home	Main menu	Touch to switch screen to main menu
Hide shortcut menu	Hide shortcut menu	Touch to hide the shortcut menu button area
Backstage	Backstage	Touch to show all programs running in the background
Return	Return	Touch to switch screens to return to previous screen
Apps	Apps	Touching will take you to the icon desktop of the installed application
Navi	Navi	Touch to enter the navigation interface
Music	Music	Touch to enter the music play interface
BT Calls	BT Calls	Touch to enter the address book and calls interface

### 3. On screen - Drop-down list

Icon	Name	Operations
Wi-Fi	Wi-Fi	Turn on/off Wi-Fi
Bluetooth	Bluetooth	Turn on/off Bluetooth
Car setting	Car setting	Touch to enter Car setting
Sound Settings	Sound Settings	Touch to set volumes of the player
System optimize	System optimize	One-click to close background running programs
Close Screen	Close Screen	Open/Close Screen

## 【Main functions and usage】

### 1. Network Radio(Available after activation)

With mainstream radio stations covering more than 20 countries and regions, you can listen freely to any real-time and popular content in global. Top 30 popular list is updated every week, and smart recommendation of popular content. It also supports intelligence voice control.

Connect to the Internet, select a country, and the interface will display the mainstream radio stations in the region. Click the channel in the list to listen online.

### 2. Weather(Available after activation)

Real-time weather information in global cities can be showed with network to check temperature(both support degrees centigrade and Fahrenheit)Humidity, Visibility, UV, Rain/Snow and Wind conditions, escort for your travel.

Connect to the network, turn on location positioning or manually search for the city, and select the module on the right (choose up to 3 items) according to your preferences to display weather-related

information.

### 3. AI voice assistant(Available after activation)

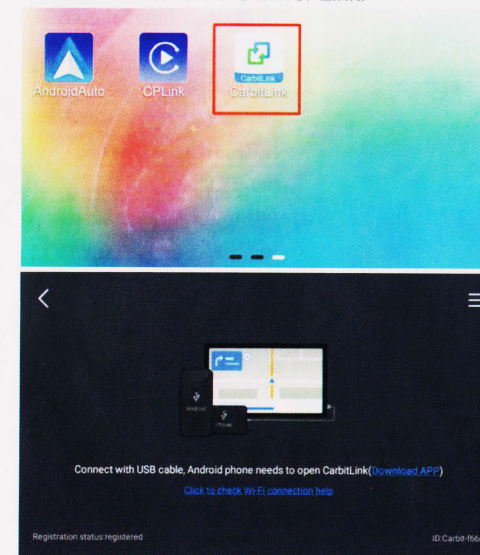

Intelligent voice assistant can directly control the player to check real-time weather, music playing and listen to online radio, enjoying more convenient and safer drive experience.

You can say "Hey Podofo" or press the button to wake it up, then say your commands following the guide in the introduction interface.

### 4. Mirror Link---CarbitLink

For Mirror Link, you can choose Wired/Wireless Connection according to your requirements. You can click the corresponding module to see how to use the Mirror Link.

① Touch CarbitLink to enter the mirror link interface.

② Follow the APP guides to operate. You can connect with original USB cable of your mobile phone, or open the phone hotspot to check WIFI connection.

③ Wait for connection and then your mobile phone displays will mirror in the car screen.

## 5. Wireless & Wired Carplay/Android Auto

### Carplay Connection Considerations

1. Carplay function only supports Apple mobile phone connection
2. The data cable used for Carplay connection must be the original iPhone data cable

### Android Auto Connection Considerations

1. The Android Auto function can only support the connection of Android phones, and the Huawei version of the phone does not support the connection
2. Your Android phone needs to support Google services and install Android Auto software

### ● Carplay/Auto Wireless Connection

① Turn on BT and find the BT name and password in the bluetooth settings.

② Touch the CPLink/ Android Auto to enter the interface and wait for automatic connection.

### ● Carplay/Auto Wired Connection

- ① Connect with original USB cable of your mobile phone and plug it into the USB port of the car player.
- ② Touch the CPLink/ Android Auto to enter the interface and wait for automatic connection.

## 6. Offline Map—HERE WeGo

(Note: You can also use other online maps)

In order to use the offline feature of your device, follow the steps below to set it up.

1. Power on the device and connect the device to the internet via Wifi.
2. Find the APP named HERE WeGo in the main menu.

3. Follow the APP prompts to enter the main map page and find the options menu.

4. Click "Use the app offline" and download your favorite map data in the country list.

## 【Supported Additional Devices】

(Note: Additional devices are not included in the product and accessories, you need to purchase additionally!)

Icon	Name	Connection Way
	External Microphone	RCA MIC Interface
	DAB+	USB
	DVR	USB
	OBD	Bluetooth
	Subwoofer	RCA audio output or subwoofer interface
	Amplifier	RCA audio output interface
	Video Output	USB
	U disk	USB

## 【Parameters】

Category	Parameter
Main Frequency	2.0GHz
Radio	FM/RDS
Radio Chip	8035
Communication	WIFI
Rear Camera Standard	AHD720 & CVBS
Satellite Positioning	GPS
Amplifier	7388
BT/GPS/WIFI	MT6631
Sound Decoder	BU32107
EQ DSP	Support
Carplay	Wireless & Wired
Android Auto	Wireless & Wired

Colorful Lights	White light
USB	Dual USB
External Microphone	Support
